Staff engineer with 12+ years building data-intensive backend systems and developer platforms. Comfortable leading cross-team technical initiatives, mentoring engineers and turning ambiguous problems into reliable, well-documented services. All data in this profile is fictional.

EXPERIENCE

Staff Software Engineer · **Tidewater Labs** — Jan 2022 - Present
Observability and developer platform company · Lisbon, Portugal
Technical lead of the ingestion platform, a 9-engineer group spanning three teams.

- Redesigned the event ingestion pipeline, cutting p99 latency from 1.8s to 350ms while tripling throughput.
- Introduced service-level objectives and error budgets across 14 services, reducing paging incidents by 45%.
- Mentored six engineers, two of whom were promoted to senior; ran the internal technical-writing guild.

Senior Software Engineer · **Lumen Analytics** — Sep 2018 - Dec 2021
Business intelligence SaaS · Porto, Portugal
Owned the data-modeling and query services behind customer dashboards.

- Built a columnar query layer that made dashboards 8x faster for the largest customers.
- Led the migration from a single PostgreSQL cluster to a sharded architecture with zero planned downtime.
- Created the internal data-contract process adopted by all product teams.

Full-Stack Developer · **Brightpath Software** — Jun 2016 - Aug 2018
Product consultancy · Lisbon, Portugal
Delivered web products for clients in logistics, health and education.

- Shipped 11 customer projects end to end, from discovery to production support.
- Standardized the team's CI/CD templates, halving the time to set up a new project.

Software Developer · **Cobalt Freight Systems** — Jul 2014 - May 2016
Logistics software · Lisbon, Portugal
Developed route-planning and tracking services.

- Implemented a route-optimization service that reduced fleet mileage by 9%.
- Replaced nightly batch jobs with an event-driven tracking pipeline.

Junior Web Developer · **Kestrel Studio** — Sep 2012 - Jun 2014
Digital agency · Lisbon, Portugal
Built marketing sites and interactive campaigns.

- Developed 20+ responsive marketing sites with a focus on accessibility and performance.

PROJECTS

Pipeline Observatory · Open source · Creator, Maintainer — Mar 2021 - Present
Open-source tool that traces data lineage across batch and streaming pipelines.

- 2.4k GitHub stars; used in production by 30+ companies.
- Plugin system with 12 community-contributed connectors.

Go · Kafka · OpenTelemetry

Schema Sentinel · Author — May 2023 - Present
Data-contract linter that blocks breaking schema changes in CI.

- Adopted by 40 repositories at Tidewater Labs within six months.

TypeScript · JSON Schema · GitHub Actions

Fluent Forms · Open source · Creator — Apr 2019 - Jun 2022
Accessible, headless form library for React.

- Zero-dependency core of 4 KB; full keyboard and screen-reader support.

React · TypeScript · Accessibility

cv-factory — Oct 2026 - Present
CLI that renders tailored, ATS-friendly CVs from a single structured source of truth.

- Variants, bilingual content and swappable templates from one JSON file.

TypeScript · Typst · JSON Schema

SKILLS

Languages (Expert) TypeScript · Go · Python · SQL
Backend & Data (Expert) Node.js · PostgreSQL · Kafka · Redis · gRPC
Platform & Cloud (Advanced) Kubernetes · Terraform · AWS · Observability
Frontend (Advanced) React · Accessibility · Web Performance · Design Systems
Leadership Technical strategy · Mentoring · Technical writing

EDUCATION

Riverside Institute of Technology · Master of Science, Distributed Computing 2010 - 2012
GPA 18/20
Courses: Distributed Systems, Database Internals, Performance Engineering

Lakeview University · Bachelor of Science, Computer Science 2007 - 2010
GPA 16/20

CERTIFICATIONS

Cloud Architecture Professional · Example Cloud Institute Mar 2025
Kubernetes Operations Specialist · Open Orchestration Foundation Sep 2024
Secure Software Engineering · Secure Code Alliance Feb 2024
Data Engineering Professional · Data Guild Oct 2023
Site Reliability Practitioner · Reliability Institute Jun 2023
Advanced TypeScript · Frontend Craft Academy Jan 2023
Distributed Systems Fundamentals · Systems School Aug 2022
Agile Leadership · Leadership Lab Mar 2022
PostgreSQL Performance · Database Workshop Nov 2021
Web Accessibility Specialist · Inclusive Web Organization May 2021
Scrum Practitioner · Agile Forum Sep 2019
Linux Administration · Open Systems Academy Apr 2018

AWARDS

Engineering Excellence Award · Tidewater Labs Dec 2024
Recognized for the ingestion platform redesign.

Best Open-Source Tool · Data Infrastructure Conference Oct 2022
Community vote for Pipeline Observatory.

PUBLICATIONS

Error Budgets in Practice · Reliability Engineering Journal Apr 2024
A field study of adopting service-level objectives across 14 services.

Data Contracts Without the Ceremony · Samrivera.example.com/blog Aug 2023
A lightweight approach to schema governance for product teams.

VOLUNTEERING

Technical Mentor · **Code for Communities** Feb 2020 - Present
Mentor in a non-profit program that teaches programming to career changers.

- Mentored 25+ learners; 18 landed their first developer job.
- Designed the backend curriculum used in three cohorts.

Contributor · **Open Data Lisbon** Mar 2017 - Dec 2019
Built civic-data tools with a volunteer community.

- Maintained a public transit data API used by two city apps.
